

# CLASS WARGAMES

- is inspired by Guy Debord and Alice Becker-Ho's *The Game of War*;
- investigates gaming as a metaphor for social relations under repressive neo-liberalism;
- celebrates the craft skills of gamers as artistic expression;
- creates a social space where lefties can meet & play games with each other;
- re-enacts the proletarian struggles of the past in ludic form;
- trains the militants of the cybernetic communist revolution to come.
